

# FAVAD THOTTATHIL

Flutter Developer

Bengaluru, India | favadfavad2@gmail.com | +91 8129613322 | LinkedIn: [favadthottathil](#) | GitHub: [favadthottathil](#) | Portfolio: [portfolio-favad-ts-projects.vercel.app](#)

## PROFILE SUMMARY

Flutter Developer with 3.4+ years of experience shipping Android and iOS apps for a live B2B company. Led the architecture for CollegeLinkr, a B2B EdTech platform, from the ground up using Clean Architecture and BLoC, and now own the full release pipeline: CI/CD, code signing, Play Store and App Store publishing. Built an Appium test suite that cut manual regression testing by 30%.

## TECHNICAL SKILLS

- **Flutter & Mobile:** Flutter, Dart, Android, iOS, Material Design, Cupertino
- **Architecture:** Clean Architecture, MVVM, SOLID, OOP, DI (get\_it/injectable)
- **State Management:** BLoC (flutter\_bloc), MobX, Provider, GetX, Riverpod
- **Backend & APIs:** Firebase (Auth, Firestore, Cloud Functions, FCM), Dio/Retrofit/REST, Node.js, FastAPI
- **Navigation & Security:** go\_router, flutter\_secure\_storage, Certificate Pinning, JWT Auth
- **DevOps & Testing:** GitHub Actions, Azure DevOps, Appium, flutter\_test, bloc\_test, mocktail, Flutter DevTools
- **Tools:** Postman, Razorpay, VideoSDK, Google Maps API, Claude Code, OpenAI Codex

## WORK EXPERIENCE

### Flutter Developer — Promilo (Sawara Solution Pvt Ltd)

Mar 2024 – Aug 31, 2026

- Build and maintain production features for Promilo's B2B mobile platform in Flutter, using Clean Architecture and MobX
- Lead the architecture and development of CollegeLinkr, a B2B EdTech platform, across 8 feature modules built on Clean Architecture and BLoC (full details under Projects)
- Designed the networking layer with Dio and Retrofit, including automatic JWT refresh, to safely handle sensitive financial and KYC data; integrated VideoSDK for real-time video calling between users and business clients
- Set up GitHub Actions pipelines for Promilo and CollegeLinkr, automating testing and code-quality checks; manage the release process end to end — signed AAB builds, secrets via git tags — through to Play Store and App Store publishing
- Built an Appium automation suite that cut manual regression testing time by 30%; turn Figma designs into pixel-accurate, responsive UI for Android and iOS

### Trainee Flutter Developer — Prototype

2022 – 2023

- Completed an intensive hands-on Flutter & Mobile App Development training program — built real Flutter/Dart projects under mentorship, covering widgets, state management, REST API integration, and Android/iOS deployment

## PROJECTS

### CollegeLinkr — EdTech Agent Mobile Application (Company Project)

Flutter, BLoC, Clean Architecture, Dio/Retrofit, Razorpay | iOS & Android | June 2026 – Aug 31, 2026

Live on Play Store: <https://play.google.com/store/apps/details?id=com.member.collegelinkr.app>

- Used by education consultants/agents to manage college admission leads end to end — browse colleges and courses, pick and track leads, submit applications, handle commission payouts, and complete KYC
- Led the architecture for a production Flutter app (iOS 18+/Android API 35+) with 8 feature modules using Clean Architecture and BLoC for predictable state management
- Built a Lead Marketplace with wallet or Razorpay payment options and a tiered recharge bonus system, plus a searchable College Directory and a 4-tab Application Tracking flow with automated commission-refund countdowns

### CollegeLinkr Student — College Discovery & Application App (Company Project)

Flutter, BLoC, Clean Architecture, go\_router, Razorpay | Android & iOS | June 2026 – Aug 31, 2026

- Solo-built a companion app for prospective students to discover college programs, complete admission applications, pay fees, and track application status end to end
- Built a JWT-based OTP authentication system with silent token refresh, plus a server-driven 6-step dynamic application form engine from a backend JSON schema
- Integrated Razorpay for application-fee payments with backend-verified status, plus in-app document upload and PDF previews; deep linking with auth-gated go\_router routing

### Promilo Mobile Application (Company Project)

Flutter, MobX, Clean Architecture

Live on Play Store: <https://play.google.com/store/apps/details?id=com.promilo.app>

- Promilo's core B2B mobile app, used by students and job seekers across India to explore opportunities and connect with companies
- Built a dynamic form engine driven by server-side schemas, so new fields can ship without an app update
- Applied Clean Architecture across 15+ feature modules; integrated Razorpay for in-app payments and cut app size via R8/ProGuard shrinking
- Built an Appium suite for key regression flows, cutting manual testing time by 30% per release

### Flutter Metrics SDK & AI Performance Dashboard

Flutter, Dart, Node.js, PostgreSQL, Gemini API, Razorpay

Flutter SDK: [GitHub](#) | pub.dev: [flutter\\_metrics\\_sdk](#) Backend: [GitHub](#) Dashboard: [Live](#)

- Published flutter\_metrics\_sdk on pub.dev — captures render-time, frame-drop, API-latency, and crash events with auto-flush on lifecycle changes, backed by 16 unit tests
- Built a companion Flutter Web dashboard (fl\_chart, go\_router) showing real-time metrics with AI-generated, severity-scored insights
- Built the backend on Node.js/Express and PostgreSQL with a JWT-authenticated ingestion API, per-key rate limiting, and SSE streaming; integrated Razorpay for subscription billing and Gemini for auto-generated issue/recommendation reports

## EDUCATION

- Diploma in Land Surveying — Govt. ITI, Areekode | 2019–21 | HSC — DHSE Kerala | 2017–19
