PROFESSIONAL SUMMARY

Flutter Developer with 3+ years of experience building and launching cross-platform Android and iOS apps used by real customers, including **Promilo (100,000+ downloads, 4.7-star rating)**. Strong in **Flutter, Dart, Clean Architecture, BLoC/Cubit, REST API integration, Firebase, CI/CD and automated testing**, with hands-on experience in responsive UI, performance optimization, deep linking, payment gateway integration and LLM/AI integration. Strong communicator and problem-solver focused on code quality and user data security; works closely with designers, backend developers and QA, and takes ownership of features from design to release.

KEY ACHIEVEMENTS

- **100,000+ downloads, 4.7-star rating** on Promilo (Google Play) – features built and maintained
- **2 apps launched in 3 months** on Google Play and the App Store (CollegeLinkr), from first design to release
- **33% smaller app** (45 MB to 30 MB) and **30% less manual testing** through 42+ automated tests
- **160+ automated test files** and automatic releases (GitHub Actions, Fastlane) on a freelance project

KEY SKILLS

- **Mobile Development:** Flutter, Dart, Cross-Platform Development, Android, iOS, Android SDK, Kotlin, Swift (basics), Widgets, Reusable UI Components, Responsive UI, Material Design, Animations, Platform Channels (MethodChannel, Pigeon), Native Integration, Deep Linking, Performance Optimization, Flutter Web, Flavors
- **Architecture & State Management:** Clean Architecture, MVVM, Repository Pattern, BLoC/Cubit, Riverpod, Provider, GetX, State Management, Dependency Injection (get_it, injectable), Server-Driven UI, SOLID, OOP, Design Patterns, Modular Architecture
- **Networking & Backend:** REST APIs, API Integration, Third-Party SDK & Library Integration, JSON Parsing, Dio, Retrofit, Firebase, FCM Push Notifications, WebSocket, Streaming, Node.js, FastAPI
- **Local Storage & Security:** Hive, SQLite, Drift, Offline Data Handling, Local Caching, JWT Authentication, Mobile App Security, Secure Coding, R8 Obfuscation
- **Testing & Quality:** Unit Testing, Widget Testing, Integration Testing, Mockito, Mocktail, Appium, Code Reviews, Debugging & Troubleshooting, Clean Code, Coding Best Practices, Crashlytics
- **Release & DevOps:** CI/CD, GitHub Actions, Fastlane, Docker, Docker Compose, GitHub Container Registry (GHCR), Git (Version Control), App Signing, Release Management, Google Play Console, TestFlight, App Store
- **Tools & Practices:** Figma, Postman, Payment Gateway Integration (Razorpay), Google Maps, LLM/AI Integration (Gemini API), Claude Code, Agile/Scrum
- **Soft Skills:** Communication (verbal and written), Problem-Solving, Ownership, Cross-Functional Collaboration, Team Collaboration, Independent Work, Attention to Detail

WORK EXPERIENCE

Flutter Developer · Promilo (Sawara Solution Pvt Ltd), Bengaluru · Mar 2024 – Aug 2026

- Built and improved features for Promilo, a business app with **100,000+ downloads** and a **4.7-star rating** on Google Play.
- Optimized app performance and reduced app size by **33%** (45 MB to 30 MB); cut manual testing effort by **30%** with **42+ automated tests** (Appium).
- Set up **CI/CD with GitHub Actions** to check every code change automatically, catching problems before users see them.
- Led technical planning of **CollegeLinkr (Clean Architecture, BLoC)** and built its Student app on my own, launching **2 apps on Android and iOS in 3 months** (Jun – Aug 2026).
- Built secure **JWT sign-in** for CollegeLinkr, which handles payment and identity-verification details, and tested it thoroughly.
- Managed releases end to end on **Google Play and the App Store**; worked in **Agile sprints** and took part in code reviews.

Trainee Flutter Developer · Brototype, Calicut · Nov 2022 – Oct 2023

- Completed a one-year training and internship program, building Android and iOS apps with Flutter.

PROJECTS

Promilo App · Company project · Mar 2024 – Aug 2026 · Live on Google Play

- A business app used by **100,000+ people**, with a **4.7-star rating** on Google Play.
- Built a flexible **form system** and **in-app video calling**, so users can meet and share details inside the app.
- Added **push notifications (FCM)** and live crash tracking (**Firebase Crashlytics**); built **responsive UI** screens from Figma designs using Flutter widgets and Material Design, working on all phone sizes.
- Backed by **42+ automated tests** and **CI/CD (GitHub Actions)**; app made **33% smaller**.

CollegeLinkr Agent App · Company project · Jun 2026 – Aug 2026 · Live on Google Play

- An app for education consultants to find, manage and track college admission leads from start to finish.
- Built a **lead marketplace** with an in-app wallet, **payment gateway integration (Razorpay)** and bonus offers on recharges.
- Added a college directory and application tracking with commission and refund countdowns.
- Protected user data with **JWT authentication**, automatic logout after 15 minutes of inactivity, and screenshot blocking on payment and identity-verification screens.
- Added **push notifications (FCM)** with **deep linking** that opens the right screen, and in-app announcement banners.
- Wrote **34 automated test files** and monitored live crashes (Firebase Crashlytics).

CollegeLinkr Student App · Company project · Jun 2026 – Aug 2026 · Android & iOS

- Built this student app **entirely on my own**: students discover colleges, apply, pay fees and track their application status.
- Created a **6-step application form controlled from the server** (server-driven UI), so updates go live without a new app release.
- Added **OTP sign-in** that keeps users signed in safely, and fee payments confirmed by the server before an application is marked as paid.
- Added document upload, in-app PDF preview, and **deep linking** that opens the right screen after sign-in.

Navarasami Home Services Platform · Freelance project · Aug 2026 – Present

- Built **2 mobile apps**: a Customer app (service booking, quotations, **Razorpay payments**, complaint tracking, notifications) and a Service Adviser app for field staff (attendance check-in, site visits, material requests, location tracking).
- Designed for easy maintenance (**Clean Architecture, BLoC**), with secure sign-in and protected user data.
- Set up **160+ automated test files** and an automatic release process (**GitHub Actions, Fastlane**) with signed builds and crash reporting (Firebase Crashlytics).

Personal projects

- **Flutter Gemini Chat:** AI chat app with **LLM integration** that streams Google Gemini replies live as they are written, with **98 automated tests**. View on GitHub
- **flutter_device_insights:** Free, open-source Flutter plugin that lets apps read device details such as battery level and phone model on Android and iOS, using **native integration** (**Kotlin** and **Swift**) through **Platform Channels**. View on GitHub
- **App Performance Dashboard:** Measures how fast an app runs, stores the results (Node.js, PostgreSQL) and shows them on a web dashboard with AI-written insights (Gemini API). Live dashboard
  - Used **Docker** to package the server and database so the whole system starts with one command; automatic builds publish it and it runs live on Render.
- **Zenith AI:** AI-powered mobile app with **LLM integration** that streams instant, live answers (Google Gemini, WebSocket); I built both the app (Flutter) and its server (FastAPI). Download Android app
  - Used **Docker** to package the server so it runs the same everywhere, keeping passwords and keys out of the code; automatic builds publish it to GitHub Container Registry.

EDUCATION

Diploma in Land Surveying · Government ITI, Areekode · 2019 – 2021
Higher Secondary Education · DHSE Kerala · 2017 – 2019
