

FAVAD THOTTATHIL

Flutter Developer | Android & iOS Mobile App Developer

Bengaluru, India | favadfavad2@gmail.com | +91 8129613322 | Immediate Joiner (No Notice Period)

<https://www.linkedin.com/in/favadthottathil/> | <https://github.com/favadthottathil> | <https://portfolio-favad-ts-projects.vercel.app>

PROFILE SUMMARY

Mobile app developer with 3.4+ years of experience building Android and iPhone apps that real people use every day, including Promilo (100K+ downloads, 4.7 star rating). In 3 months, I took two new apps from first design to launch on the Google Play Store and Apple App Store. I work well in teams, care about app quality and security, and I am available to join immediately.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Android, iOS, Material Design, Cupertino, go_router (navigation, deep linking)

Architecture & State Management: Clean Architecture, MVVM, SOLID, OOP, BLoC, MobX, Provider, GetX, Riverpod, Dependency Injection (get_it, injectable)

Networking & Backend: REST APIs, Dio, Retrofit, Firebase (Auth, Firestore, FCM, Crashlytics), push notifications, Node.js

Local Storage & Security: Hive, Drift, SQLite, SharedPreferences, flutter_secure_storage, JWT authentication, certificate pinning

Testing & Quality: Unit, widget and integration testing, mocktail, mockito, Appium, code reviews, app performance and app size optimization

Release & DevOps: Google Play Console, App Store Connect, TestFlight, CI/CD, GitHub Actions, Azure DevOps, Git

Tools & Practices: Razorpay, Google Maps, VideoSDK, Postman, Figma, Claude Code, OpenAI Codex, Agile/Scrum

WORK EXPERIENCE

Flutter Developer | Promilo (Sawara Solution Pvt Ltd), Bengaluru

Mar 2024 - Aug 2026

- Built and maintained multiple features of Promilo, a business app with 100K+ downloads and a 4.7 star rating on the Play Store.
- Made the app 33% smaller (45 MB to 30 MB), so it downloads faster and uses less phone storage.
- Led the technical planning of CollegeLinkr and built its companion Student app on my own, launching two apps on Android and iPhone in 3 months (Jun-Aug 2026).
- Built a safe login and data system for CollegeLinkr, which handles users' financial and identity (KYC) details, and tested it thoroughly.
- Set up automatic quality checks that run on every code change, so problems are caught before users see them.
- Managed app releases from start to finish, including the Google Play Store and Apple App Store publishing process.
- Added push notifications and crash monitoring, and turned design files into clean screens that work on all phone sizes.
- Built an automated testing suite (42+ test cases) that reduced manual testing effort by 30%.
- Worked in Agile/Scrum sprints and took part in code reviews.

Trainee Flutter Developer | Brototype, Calicut

Nov 2022 - Oct 2023

- Completed a one-year Flutter training and internship program, building Android and iPhone apps.

PROJECTS

CollegeLinkr - Agent App (Company Project) | Jun 2026 - Aug 2026

Live on Play Store (50+ downloads): play.google.com/store/apps/details?id=com.member.collegelinkr.app

- An app for education consultants to find, manage and track college admission leads from start to finish.
- Built a lead marketplace with an in-app wallet, online payments (Razorpay) and bonus offers on recharges.
- Added a college directory and application tracking with commission and refund countdowns, so consultants always know where each case stands.

- Protected user data with secure login, automatic logout after 15 minutes of inactivity, and screenshot blocking on payment and KYC screens.
- Added push notifications with deep links that open the right screen when tapped, and in-app banners for important announcements.
- Tested the app with 34 automated test files and monitored live crashes to keep it stable.

Promilo - B2B Platform (Company Project) | Mar 2024 - Aug 2026

Live on Play Store: play.google.com/store/apps/details?id=com.promilo.app

- Maintained and improved a busy business app with 100K+ downloads and a 4.7 star rating, owning multiple features.
- Built a flexible form system and in-app video calling so users can meet and share details inside the app.
- Made the app 33% smaller (45 MB to 30 MB) and faster to download through app size optimization.
- Created an automated testing suite (42+ test cases) that cut manual testing effort by 30%.
- Added push notifications and crash reporting to keep users informed and catch problems early.
- Turned design mockups into polished screens and handled releases to the Play Store and App Store.

CollegeLinkr Student - Admission App (Company Project) | Jun 2026 - Aug 2026

Android & iPhone

- Built this student app entirely on my own: students can discover colleges, apply for admission, pay fees and track their application status.
- Created a 6-step application form that updates from the server, so changes can go live without an app update.
- Added simple login with a one-time password (OTP) that keeps users signed in safely.
- Set up secure online fee payments that are confirmed by the server before an application is marked as paid.
- Added document upload, in-app PDF preview, and deep linking (links that open the right screen after login).

Flutter Metrics SDK & AI Performance Dashboard (Personal Project)

Open-source tool and web dashboard

Live Dashboard: <https://ai-performance-intelligence-dashboa.vercel.app>

SDK: https://github.com/favadthottathil/flutter_metrics_sdk

Dashboard: <https://github.com/favadthottathil/ai-performance-intelligence-dashboard-Flutter-web>

Backend: <https://github.com/favadthottathil/ai-performance-intelligence-backend>

- Built and published a tool for app developers that measures how well their app performs while it runs.
- Built a server that stores this performance data for analysis.
- Built a web dashboard that shows the results in easy charts, with AI-written insights using Google Gemini.
- Built the whole system, from data collection to the final dashboard.

Zenith AI (Personal Project)

Cross-platform AI app

Android APK: <https://drive.google.com/file/d/1UoRn2k7PXljdUzWEVpdQZbUjQZpA6Hz4/view?usp=sharing>

Frontend: <https://github.com/favadthottathil/ZenithAI-FrontEnd>

Backend: <https://github.com/favadthottathil/ZenithAI-Backend-python>

- Built an AI-powered app that gives instant, live responses, using Google Gemini.
- Built and deployed both the app and its server.

EDUCATION

- **Diploma in Land Surveying** - Govt. ITI, Areekode | 2019 - 2021
- **Higher Secondary** - DHSE Kerala | 2017 - 2019
